

**CPT6314 Final Year Project (FYP) 1 Meeting Log
Trimester OCT / NOV 2025 (Trimester ID:2530)**

Meeting Date: 23/1/2026	Meeting No.: 4
Meeting Mode: Online / Face-to-Face	
Project ID: 771	Project Type: Research-based / Application-based
Project Title : Personalized Fitness Tracker & Smart Workout Planner Mobile Application	
Student ID : 1211111950	Student Name: ADAM FIKRI BIN MOHD LOTFI
Student Programme and Specialisation: B.C.S (Hons.) Software Engineering	
Supervisor Name: Nur Haifa binti Mohd Fathil	Co-Supervisor Name: (if applicable) N/A
Collaborating Company: (if applicable) N/A	Company Supervisor Name: (if applicable) N/A

1. WORK DONE

[Please write the details of the work done, after the last meeting]

Tasks: ~~Problem Formulation and Project Planning / Background Study or Literature Review / Requirement Analysis or Theoretical Framework / Design or Research Methodology / Prototype Development or Proof of Concept / Draft Report Completion~~

(Please strike out the tasks, which are not applicable)

Details (in point form):

1. Completed Chapter 2 (Literature Review) with integrated mathematical equations and formulas
2. Drafted comprehensive functional requirements outlining core system capabilities
3. Drafted non-functional requirements covering performance, usability, security, and scalability considerations
4. Drafted user requirements based on target audience analysis
5. Presented all draft requirements to supervisor for review and received approval to proceed
6. Created initial prototype design in Figma demonstrating user interface and interaction flows
7. Developed architecture diagram illustrating system components and their relationships
8. Designed preliminary class diagram mapping object-oriented structure of the application
9. Prepared foundation for Chapter 4 (System Design) with visual design artifacts

2. WORK TO BE DONE

Tasks: Problem Formulation and Project Planning / Background Study or Literature Review / Requirement Analysis or Theoretical Framework / Design or Research Methodology / Prototype Development or Proof of Concept/ Draft Report Completion

(Please strike out the tasks, which are not applicable)

Details (in point form):

1. Conduct user requirements survey to validate and refine drafted requirements
2. Distribute survey and collect minimum of 20 responses from target audience
3. Analyze survey results to confirm or adjust functional, non-functional, and user requirements
4. Finalize requirements specifications based on survey findings
5. Refine and complete class diagrams incorporating validated requirements
6. Finalize Figma prototype based on user feedback and confirmed requirements
7. Complete Chapter 3 (Methodology/Requirements Analysis) including survey methodology, results, and analysis
8. Complete Chapter 4 (System Design) with finalized diagrams and design specifications

3. PROBLEMS ENCOUNTERED AND SOLUTIONS

Problem

1. Previously encountered confusion regarding the integration of mathematical equations into literature review.
2. All requirements and design artifacts are currently in draft form and cannot be finalized until user survey validation is completed, creating dependency on survey response collection.

Solution

1. Successfully resolved by incorporating relevant optimization formulas, ILP modeling equations, and algorithmic representations into the literature review, strengthening its academic foundation. Supervisor confirmed adequacy of the approach.
2. Prioritize survey development and distribution immediately to meet the minimum 20-response requirement. Design survey questions to specifically validate drafted requirements (functional, non-functional, user). Allocate sufficient time for response collection to avoid delays in finalizing Chapter 3 and Chapter 4 documentation.

4. COMMENTS (Supervisor / Co-Supervisor / Company Supervisor)

IMPORTANT NOTES TO STUDENTS:

1. Items 1 – 3 are to be completed by the students prior to the meeting. Item 4 is to be completed by the supervisor / co-supervisor / company supervisor.

2. Student has to upload the soft copies of the meeting logs in eBwise and also attach them along with interim (FYP1) report.
Minimum requirement is SIX Meeting Logs (Period: Week 3 to Week 12). Students can have fortnightly meetings with the supervisor.

3. Log sheets provide the basis for evaluating the General Effort (Project Management, Attitude, and Technical Competency) of the student, by the supervisor and also for checking the attendance requirement of the student, by the FYP Committee.

This also provide the student with feedback from the supervisor / co-supervisor / company supervisor on the tasks done and provide the plan for the upcoming tasks. This can provide the motivation for the student to give consistent and efficient effort throughout the period of FYP.

4. Student who fails to meet the minimum requirement (six nos.) of log sheets will not be allowed to submit FYP report.
